## DATA TABLE

### Sustainable Raw Materials

| 301-1<sup>3</sup> | Renewable materials<sup>6</sup> | Weight (thousands of tons) of renewable materials used in products  
Includes materials derived from materials of biological origin such as natural rubber, plant  
based oils, fatty acids, etc. | 2022 | 2021 | 2020 |
|------------------|-------------------------------|-------------------------------------------------------------------------------------------------|------|------|------|
|                  |                               | % of renewable materials used in products  
Includes materials derived from materials of biological origin such as natural rubber, plant  
based oils, fatty acids, etc. | 23% | 24% | 23% |
|                  | Non-renewable and non-recycled materials<sup>6</sup> | Weight (thousands of tons) of non-renewable and non-recycled materials used in products | 2,080 | 2,082 | 1,644 |
|                  |                               | % of non-renewable and non-recycled materials used in products | 77% | 76% | 77% |

| 301-2<sup>3</sup> | Recycled input materials used<sup>6</sup> | Weight (thousands of tons) of recycled materials used in products  
Includes both pre- and post- consumer recycled materials. | 2022 | 2021 | 2020 |
|------------------|-------------------------------------------|-------------------------------------------------------------------------------------------------|------|------|------|
|                  |                                            | Percentage of recycled input materials used to manufacture the organization's primary products and services  
Includes both pre- and post- consumer recycled materials. | 0.13% | 0.13% | 0.18% |

<sup>3</sup> Goodyear data only.

<sup>6</sup> For the 2022 reporting year, Goodyear re-classified certain raw materials based on internal definitions.

<sup>7</sup> New baseline established in 2022. Will continue reporting in future years.
